

\$50 Bracelet For Only **\$5!**

Wrap bracelets like these often sell for a premium price, but they are very easy to make yourself.

Even if you have never picked up a piece of rope before, you should be able to complete this project within **30 minutes** of laying out your materials.

Not only are these bracelets easy to make, they are easy to customize. They use only one color of #550 paracord, so after choosing your color, find something to use as your clasp.

Just about anything works! Choose a <u>snap hook</u>, <u>s-hook</u>, <u>tensioner</u>, <u>shackle</u>, or even an <u>anchor charm</u> for a unique look.

Choose Your Paracord:

(From Top)

- Sweden Pride
- Black
- Aquatica
- Mil Spec Olive Drab
- Midnight Blue
- Or a different pattern from the paracord color chart.

Choose Your Clasp:

(From Top)

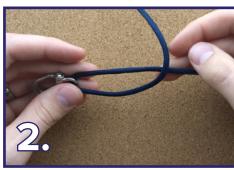

- 1/4" S-Hook
- Brass Snap Hook
- 3-Hole Tensioner
- B-Shackle
- Snap Shackle
- Or a different piece of hardware.

You Will Also Need:

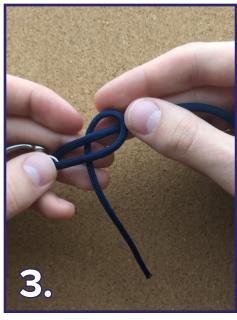

- Scissors
- Lighter
- Ruler

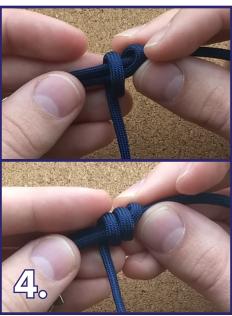

- 1. Insert paracord through the loop of your clasp/hardware.
- 2. Cross working end of paracord over standing end.

- 3. We are going to make a "triple overhand slipknot." Wrap the working end around the back.
- 4. Continue wrapping the cord around until you have a total of three passes.

- 5. Insert the end of the cord through the loops you have just made so that it comes out the top
- 6. Tighten the knot by pulling on both ends.

- 7. Slide the knot toward your clasp until tight.
- 8. Starting with the clasp on your wrist, wrap the cord around your wrist three times, taking note of where the cord meets the clasp on the third pass.

- 9. Unwrap the cord from your wrist while holding onto the place where the cord met the clasp.
- 10. Use the marked spot as the end of a loop and tie another triple overhand knot around your cord, forming a loop that is about 7 inches long. The exact size does not matter as this bracelet is adjustable. Wrap it back around your wrist three times and enjoy!
